

# MACHINE GUARDING

## Product Catalog

# INTRODUCTION

Our mission is to safeguard your business's future through unparalleled security fencing solutions. Specializing in protecting your people, equipment, and reputation, we understand the unique challenges and liabilities that company owners face in today's dynamic manufacturing environment.

We offer security barriers designed specifically for commercial applications. We recognize that the safety of your employees and assets goes beyond mere physical protection; it's about safeguarding your hard-earned success and preventing potentially libelous scenarios that could threaten your business's integrity and financial stability.

ReadyGuard is here to ensure that the future of your business is well-protected. Let us help you build a safer, more secure foundation for your company's continued growth and success.

System utilizes a captive fastening system for both framed & frameless styles

Strong wire mesh creates impenetrable barrier

The vertical slots and black finish ensure excellent visibility through the mesh panels

Panels can be cut to size for custom installations

# INSTALLATION

The READYGUARD machine guarding system is easy to install. Both the Frame and frame-less panel can be cut to custom widths. Posts have installed captive thread system & welded flanges to mount securely to concrete floor.

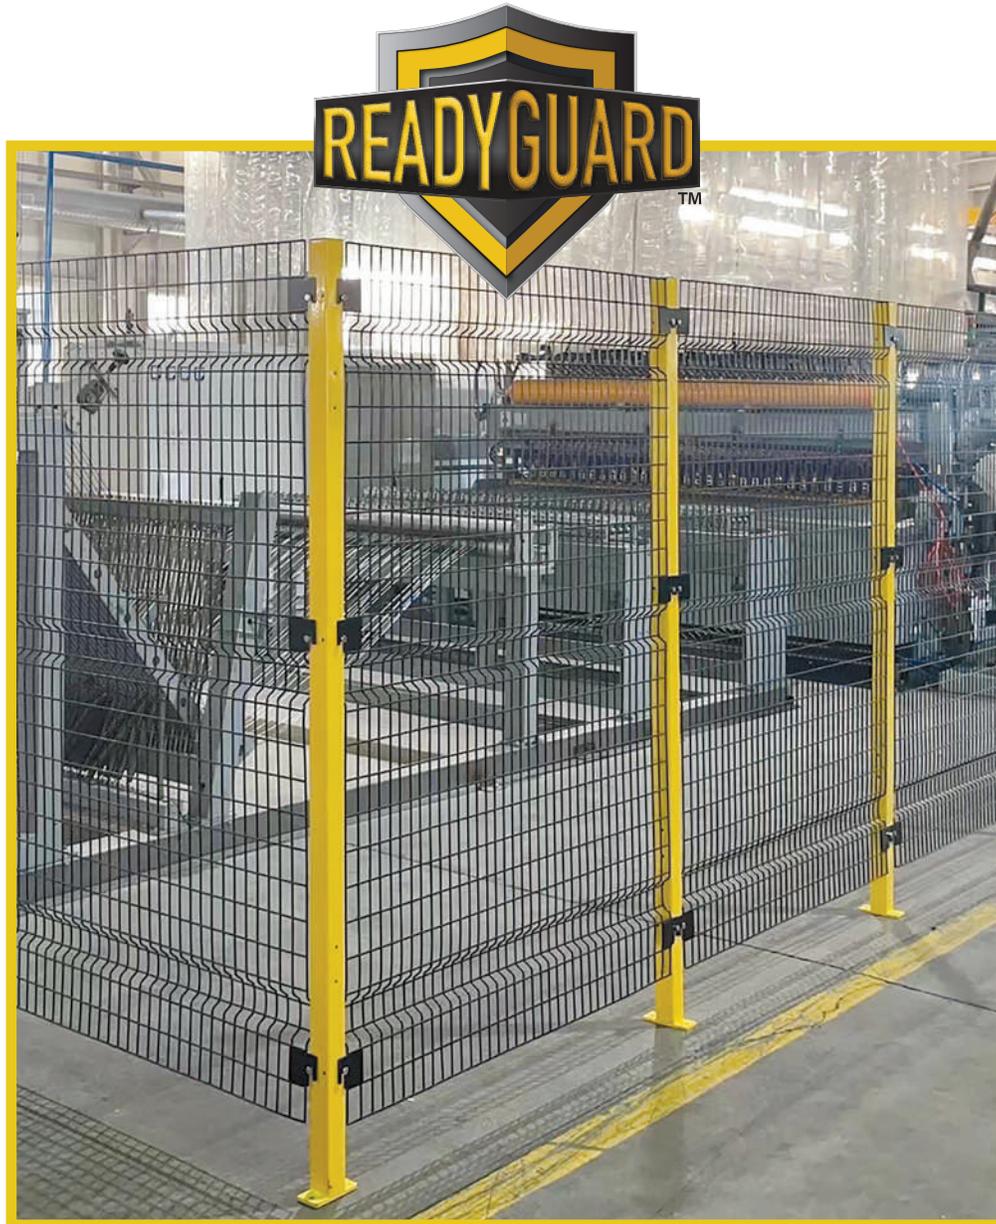

# TESTING

Framed panels and posts have been impact tested according to tests described in ISO 14120:2015 Annex C with impact energies 1600J.

Frame-less panels and posts have been impact tested according to tests described in ISO 14120:2015 Annex C with impact energies 1200J.
